

# PROJECT SHARE

It's time to give back.

## Annual Report 2006

*Thanks for giving me hope.*

~ Kurt P., Jamaica

### INTRODUCTION

Project SHARE (Supplying Hemophilia Aid and Relief) is a humanitarian program devoted solely to donating life-saving antihemophilic factor to the bleeding disorders community in developing countries.

Founded in 2002, Project SHARE is the world's first private humanitarian hemophilia program to partner with corporations to ship medicine to patients who do not qualify for assistance from any other source. Thanks to Project SHARE, millions of dollars worth of factor that would be destroyed is able to reach impoverished people with bleeding disorders. Project SHARE saves lives.

Project SHARE donations help attract rural patients to treatment centers for care. Donations also encourage patients to create hemophilia societies where none exist. Project SHARE serves as a central advisory agency for HTCs, hemophilia non-profits, home care agencies, and patients seeking information about donating factor overseas.

### ACCOMPLISHMENTS

- Donated more than **9.7 million IUs** of factor (estimated value: \$9.7 million), including:
  - A first-ever donation to Mongolia to save the life of a 15-year-old boy with a head bleed.
  - Over 1.5 million IUs of factor within seven days of expiration.
  - 70,000 IUs of factor to allow corrective foot surgery for 14-year-old Peter D. of Belize.
  - Almost 500,000 IUs of short-dated factor to Armenia and Romania.
  - Over 1.5 million short-dated IUs of factor to Nicaragua.
  - Over 1.6 million short-dated IUs of factor to Pakistan.
  - Over 500,000 IUs of factor to Zimbabwe; the largest donation they've received in two years.
- Sponsored **first-ever clinic** visits for six boys in the Philippines to receive proper hemophilia diagnoses.
- Supplied factor for the first **summer camp** in Romania and the eighth annual camp in the Dominican Republic.
- Provided guidance for the **official founding** of the Ghana Haemophilia Society.

| ■ Bosnia          | ■ Honduras           | ■ Nepal           | ■ Vietnam                      |
| ■ <b>Cambodia</b> | ■ India              | ■ Nicaragua       | ■ Zimbabwe                     |
| ■ China           | ■ Indonesia          | ■ Nigeria         |                                |
| ■ Colombia        |                      | ■ Pakistan        |                                |

- Emailed **52 weekly updates** on all factor donations to our board of directors, World Federation of Hemophilia, and other interested parties.
- Enhanced Project SHARE's visibility with **feature newspaper articles** in *The Springfield Republican* and *The Boston Globe*.
- Expanded Project SHARE's outreach to **45 countries**, including **five new recipients** (in bold at left).

# Where We Have Helped

## Guyana

Lawrence and Lloyd B., two severely factor VIII deficient brothers, depend solely on Project SHARE donations for relief.

## Jamaica

Kurt P.'s family was in great despair until a neighbor discovered Project SHARE. A factor donation arrived days later. Now Kurt is thriving.

## Uzbekistan

Dilmurod was able to control bleeding after a tooth extraction with the first Project SHARE factor donation to his country.

## Cambodia

Project SHARE's first shipment to Cambodia relieved several young patients with bleeds, and helped serve as training for new doctors.

## Pakistan

One innovative doctor began using NovoSeven® to effectively treat hemorrhaging in post-partum women. He calls each vial donated an entire generation saved.

## ANCILLARY SUPPLY DONATIONS

Project SHARE's partnership with **International Medical Equipment Collaborative (IMEC)** allows non-factor donations and ancillary medical supplies to reach qualified medical personnel in developing countries. This permits Project SHARE to focus on what we do best—shipping factor.

## SOURCES OF FACTOR DONATIONS

Project SHARE accepts donations of unwanted, in-date factor from all reputable sources. Our main sources of donations include specialty pharmacies and home care companies, US individuals, HTCs, and hemophilia nonprofit organizations.

Project SHARE does not actively seek donations from factor manufacturers, who normally donate to the World Federation of Hemophilia. Our goal is to recover excess or unwanted factor that would otherwise be destroyed. We accept any number of vials, in any assay size, within days of expiration.

## IN GRATITUDE

Our deepest thanks go to all who donated factor to Project SHARE, especially those who donated in memory of a loved one.

Project SHARE exists only through the support of our corporate partners. We thank the following companies for their committed support:

- Bayer HealthCare
- Baxter BioScience
- CSL Behring
- Grifols USA
- Hemophilia Health Services
- New England BioLabs
- Novo Nordisk Pharmaceuticals

We also send special thanks to S.T.A.R. Children Relief for its help in Romania.

## OUR VISION

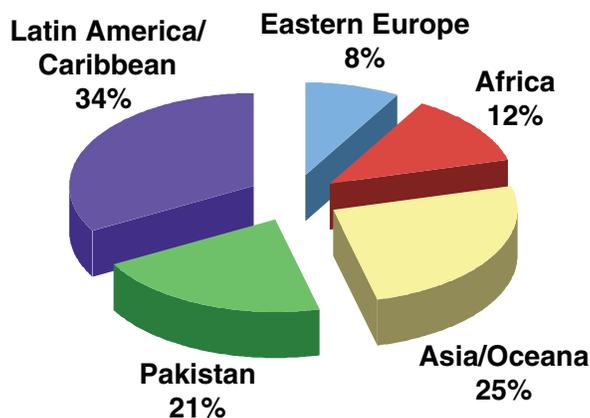

A global hemophilia community where life-saving factor is shared consistently and conscientiously, alleviating the suffering of patients in underserved countries, and empowering them to actively participate in their own healthcare.

## OUR MISSION

Encouraging the hemophilia community in developed countries to donate unwanted antihemophilic factor (AHF) to developing countries, with the following goals:

- Attracting underserved patients to treatment centers.
- Supporting camps, surgeries and physical therapy.
- Establishing independent hemophilia care.
- Alleviating suffering and saving lives.
