<b>Novo Nordisk</b>	<b>Novoeight</b>		<b>NovoSeven RT</b>			
<b>Octapharma</b>	<b>Nuwiq</b>					
<b>Pfizer</b>	<b>Xyntha</b>	<b>BeneFix</b>				

Shire bought Baxalta in 2016.

Recombinate is a first-generation product.

Kogenate FS and Helixate FS are second-generation products. They are the same product.

Advate, Adynovate, Afstyla, Alprolix, BeneFix, Eloctate, Idelvion, Ixinity, Kovaltry, Novoeight, Nuwiq, Rixubis, and Xyntha are third-generation products.\*

Kedrion distributes Koate DVI in the US for Grifols, the actual manufacturer.

Bioerativ has a manufacturing and supply agreement with Biogen.

\*There is no consensus yet on what constitutes a prolonged half-life product. Some standard half-life products have the same half-life as some products marketed as prolonged half-life. The half-life of a product may vary widely from patient to patient. Knowing your individual half-life is important; have a pharmacokinetic (PK) test to determine your individual half-life and discuss with your HTC hematologist which product best meets your treatment needs.
